

AllSeen Alliance - Gateway Working Group

2014-08-12 Weekly Technical Meeting

Agenda

1. Introductions
2. Status Updates
3. Security of the AllJoyn Package Format
4. Other Business

Attendees

Name	Company
Art Lancaster	Affinegy
Jim Howard	Affinegy
Josh Spain	Affinegy
Binita Gupta	Qualcomm
Shane Dewing	Qualcomm
Steve Kinneberg	Qualcomm
Tali Messing	Qualcomm

Action Items

1. **Art Lancaster** – publish proposed amendment 1 to the HLD
2. **Josh Spain** – contact active contributors about possible time change for weekly meetings

Meeting Notes

- Naming convention updates have been checked in for the Gateway Management App and the Gateway Controller for Android.
 - iOS controller naming convention updates will be merged 2014-08-13
- Request was made for the community to begin using the latest code that is checked in to the repository for the purpose of helping to find bugs
- Amendment 1 to the HLD to include Service Provider Mode for package management will be published this week.
- Security issues were discussed
 - Current proposed AllJoyn Package Format will be updated to conform to the existing HLD
 - 2 primary use cases were discussed with respect to security of Connector App package management:
 - Use Case 1: The gateway device ships with a trusted certificate store that is tied to a single Connector App store front. This store front is always trusted. It is the

responsibility of the store front and device vendor to insure the trustworthiness of the Connector Apps that are available for download.

- Use Case 2: The gateway device ships with the ability to download Connector Apps from any source. It verifies the signature of the Connector App using standard certificate authorities.
 - This use case needs more discussion surrounding security.
- The target use case for the first release is Use Case 1. This limits the scope of security requirements of this first release.
- Discussed moving the meetings to 13:00 GMT (8AM PDT) to allow inclusion of interested parties in East Asia
 - It will be necessary to contact all current active contributors to the project to verify this change is possible
