

**ALLSEEN  
ALLIANCE**

# **Technical Steering Meeting**

**October 10, 2016**

**Reminder:**  
**This call is being  
recorded**

# Antitrust Compliance Notice

- AllSeen Alliance meetings involve participation by industry competitors, and it is the intention of AllSeen Alliance to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of and not participate in any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- Examples of types of actions that are prohibited at AllSeen Alliance meetings and in connection with AllSeen Alliance activities are described in the AllSeen Alliance Antitrust Policy. If you have questions about these matters, please contact your company counsel, or if you are a member of AllSeen Alliance, feel free to contact Lee Gesmer or Andrew Updegrove, of the firm of Gesmer Updegrove LLP, which provides legal counsel to AllSeen Alliance.

# Agenda

1. Approve minutes from previous meeting
2. Vote to approve CDM 16.04 and CDM interfaces
3. Common Frameworks Base Services 16.10 plan
4. GWAgent 16.10 plan

**Votes**

# Votes

- **Vote to ratify the CDM interfaces**
  - **Common Device Models (formerly Home Appliances and Entertainment) interfaces cover standardized data models for a wide range of household electronics (thermostats, air conditioners, ovens, etc.)**
  - **Interfaces have been approved by the IRB, need formal ratification by the TSC**
  - **Mail sent a week ago to TSC**
- **Vote to approve CDM 16.04 release**
  - **Send Release notes Thursday evening PDT**
    - <https://git.allseenalliance.org/cgit/cdm.git/tree/cpp/docs/ReleaseNotes.txt?h=v16.04>
    - [https://git.allseenalliance.org/cgit/cdm\\_tcl.git/tree/docs/ReleaseNotes.txt?h=v16.04](https://git.allseenalliance.org/cgit/cdm_tcl.git/tree/docs/ReleaseNotes.txt?h=v16.04)

# Common Frameworks Base Services

- 16.10 release plan

# Introduction

- After a massive 16.04 release, the 16.10 release for Base Services is predominantly a bug fixing and maintenance release
- The Two Bulls team is mostly focussed on CDM 16.10

# Supported Platforms

- OpenWRT CC
- Android 4.3+
- iOS 8+
- Windows 10

*These are the platforms we will test on but more platforms may work.*

# Supported Languages

- C
- C++
- Java (Android only)
- Objective-C (iOS only)

# Roles

- Development Lead - Nathaniel Garbutt
- QA Lead - Brett Rogers

# 16.10 Base Services milestones

- **19 October 2016:** 16.10 Base Services Feature Freeze
- **2 November 2016:** 16.10 Base Services Code Freeze
- **22 November 2016:** 16.10 Base Services QA complete
- **23 November 2016:** 16.10 Base Services Release

# 16.10 Base Services release plan

- 16.10 Core
  - Ensure that Base Services builds and runs with 16.10 Core
- Security 2.0
  - Ensure it is integrated into samples and tests
- Onboarding
  - Investigate reliability issues
  - Fix some interoperability issues between samples on different platforms
  - Include Claiming as part of Onboarding (Stretch)
- Certification
  - Update C&C criteria

# 16.10 Base Services bug fixing

- **There are 41 open issues with P3 or above**
  - 15 deprecation tasks
  - 13 important bug fixes or tasks
  - 13 nice to have bug fixes (Stretch)

# **Gateway Agent Project Update**

October 10, 2016  
Art Lancaster (Affinegy)

# Gateway Agent Project – Status Update

- News since last update to TSC on August 29, 2016
  - Release completed for Gateway Agent v15.04 at the end of August – is RB15.04 at <https://git.allseenalliance.org/cgit/gateway/gwagent.git/>
  - Gateway Agent v16.04 release delayed from end of September to November
    - Affinegy's main AllJoyn resources have been on the AllJoyn core for 16.10 and also supporting XMPPConnector for version 16.04 for a customer project
- What's new in v15.04 release
  - Now includes a full AllJoyn routing node and daemon. Becomes the only AllJoyn routing node needed in the device.
  - Bug fixes and updated to core and base services 15.04, is backwards compatible with 14.12
- What's new in v16.04
  - Updated to core and base services 16.04 and OpenWRT feeds updated
    - For v16.04 build instructions with OpenWRT feeds see additional documentation at [https://bitbucket.org/affinegy/gwagent\\_openwrt\\_feed](https://bitbucket.org/affinegy/gwagent_openwrt_feed)
  - In addition to normal QA testing, is receiving real world usage in a customer project including with XMPP Connector and Affinegy's CHARIOT cloud services. Working very well, including remote events and actions support. (more on XMPP Connector project in a future TSC meeting)

# Gateway Agent Project – v16.10 plan

- Release Plan for Gateway Agent v16.10
  - In development – release planned for February 2017
  - What's new
    - Support for AllJoyn core 16.10 and Security 2.0 for the Gateway Agent management interfaces
    - Adds the Package Manager for AllJoyn.JS
      - The package manager will support installing, managing and removing any AllJoyn.JS Javascript application – general applications, or Gateway Agent JS connectors
      - Provides a standard way to install AllJoyn.JS applications to devices in the field
  - Status
    - Package manager code is functionally complete, but has not been tested with latest version of Gateway Agent
    - Changes to support for Security 2.0 have been assessed but work not yet started until after the AllJoyn core 16.10 release.

# Thank you
