Antitrust Compliance Notice

- AllSeen Alliance meetings involve participation by industry competitors, and it is the intention of AllSeen Alliance to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of and not participate in any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- Examples of types of actions that are prohibited at AllSeen Alliance meetings and in connection with AllSeen Alliance activities are described in the AllSeen Alliance Antitrust Policy. If you have questions about these matters, please contact your company counsel, or if you are a member of AllSeen Alliance, feel free to contact Lee Gesmer or Andrew Updegrove, of the firm of Gesmer Updegrove LLP, which provides legal counsel to AllSeen Alliance.

Documentation Process

Wayne Lee

Documentation Process

- New web based developer documentation (webdocs) is now live on the AllSeen Alliance webpage [<https://allseenalliance.org>].
 - This documentation will continue to evolve as each WG releases more SDKs.
 - Note that most of this content was "ported" over from existing content and will be rewritten over time to better suit this new format and organization... but for another day :)
 - The content on the website is intended for people _using_ our released SDKs and libraries. We also have a Wiki that contains work-in-progress info, maintained by each WG, that is intended for people _contributing_ to our SDKs and libraries.
- The process for submitting changes to the webdocs is just like submitting changes to the source.
 - Please go to the Technical Documentation / Website Subcommittee Wiki [https://wiki.allseenalliance.org/tsc/technical_documentation] for more information

**Continue discussion
regarding Core
processes**

Revisit (1/2)

- Existing feature field is used to make new feature requests
 - Add “Approved” state to identify when Core WG approves the feature
- Add missing items to JIRA tickets
 - Documentation
 - Test
- Consider for JIRA
 - JIRA training for Core WG & post process document/wiki
- Feature branches
 - All features/large code changes require a feature branch
 - When doing a new feature, one should assume is that you need a feature branch
 - If you do not think you need a feature branch, bring it to the Core WG for agreement
 - Each branch will have an associated JIRA ticket that is used to track the overall status of the branch
 - Tasks/Bugs are linked to this ticket

Revisit (2/2)

- Experimental definition
 - This (class, function etc) is experimental, and as such has not been fully tested. Please help make it more robust by contributing fixes if you find issues
- Policy on compatibility for API
 - Define the deprecation policy
 - Change in API requires WG and TSC approval
 - Proposal – support for 2 releases, removed after 4 releases
 - API deprecated in 15.04
 - Tested in 15.04 & 15.10
 - Not tested after 15.10
 - API remains untested in 16.04 & 16.10
 - Removed in 17.04
 - » Runtime and/or compile time warning generated if API is used

Next steps

- QCE
 - Chris to create Wiki page with process items
 - Include process for branching and merging branches
 - Include process for managing JIRA tickets
 - This will not be the final process but used for discussion before the Core WG votes
 - Marcello to update JIRA to include new fields
 - Documentation
 - Test requirements
 - David to set up JIRA training
 - Will be recorded
- Close on test process discussion
