

AllSeen Alliance - Gateway Working Group

2014-09-09 Weekly Technical Meeting

Agenda

1. Introductions
2. Status Updates
3. Package Manager Clarifications
4. Other Business

Attendees

Name	Company
Art Lancaster	Affinegy
Jim Howard	Affinegy
Josh Spain	Affinegy
Javier Domingo Cansino	Fon
Binita Gupta	Qualcomm
Tsahi Asher	Qualcomm
Thierry Luo	Yeah

Action Items

1. Art Lancaster – send presentation about gateway agent to list
2. Jim Howard – push Package Manager code to git
3. Josh Spain – move meeting 30 minutes later

Meeting Notes

- Presentation about gateway agent will be sent out this week
- Basic Package Manager code is working
 - Should be pushed to git later this week
- Issues with existing code examples and HLD were mentioned in an email to the list by Jim Howard.
 - An example in the source code should be deprecated
 - In another example that the Package Manager was based on is a script called `install_all_package.sh`. There is a problem that this script extracts the application ID from the manifest, however the HLD says that the app manager must already know the application ID
 - What unix group ID should the AllJoyn Control Application use
- There is work in AllJoyn Security 2.0 that directly impacts the current design of the Gateway Agent.

- The message header is not currently encrypted. Security 2.0 will encrypt this message header. This will ultimately prevent the ability to support feature-based filtering of messages.
 - We will discuss this as a main agenda item in the next meeting.
- Package Manager Clarifications
 - Members of the group still need to read and provide feedback via email.
- HLD Amendment 1 Discussion
 - Clarification was requested on the interface between the TR-069 client and the Gateway Management App
- New Meeting Time Proposal
 - Everyone agreed to move the meeting to 30 minutes later
