 - <https://lists.allseenalliance.org/pipermail/allseen-hae/2016-January/001268.html>
- Split each cycle interface into two interfaces.
 - One is for OperationalCycle, the other is for CyclePhase.
 - Remove “NotSupported” from each interface.
- Do not require both interfaces for each cyclic operation device.
 - (Note) We will revisit the mandatory vs optional for each device type when we develop HAE certification program.

Git Repository for HAE TCL

- Is it better to have a separate Git repository for thin client based HAE codes ?
- There are “base” and “base_tcl” for Base Services project.

Thank you
