

**ALLSEEN
ALLIANCE**

**HAE Service Framework –
Weekly Technical Meeting**

January 7, 2016

Antitrust Compliance Notice

- AllSeen Alliance meetings involve participation by industry competitors, and it is the intention of AllSeen Alliance to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of and not participate in any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- Examples of types of actions that are prohibited at AllSeen Alliance meetings and in connection with AllSeen Alliance activities are described in the AllSeen Alliance Antitrust Policy. If you have questions about these matters, please contact your company counsel, or if you are a member of AllSeen Alliance, feel free to contact Lee Gesmer or Andrew Updegrove, of the firm of Gesmer Updegrove LLP, which provides legal counsel to AllSeen Alliance.

**Reminder:
This call is being
recorded**

Agenda

1. Approve Meeting Minutes from Previous Meeting
2. Resolve IRB's Comments on PlugInUnits
3. Change Property Name for RemoteControllability
4. Discuss on Code Contributions

Resolve IRB's Comments on PlugInUnits

- <https://git.allseenalliance.org/gerrit/#/c/5125/10/interfaces/org.alljoyn.SmartSpaces.Operation/PlugInUnits-v1.md>
- <https://lists.allseenalliance.org/pipermail/allseen-hae/2016-January/001250.html>
- Proposed Resolution
 - For standard client version controllee device, dynamically adding and removing the bus objects for plugin units should be implemented.
 - Create a Jira ticket in Core WG to request ajtcl's support for dynamically adding and removing bus object.
 - In case of thin client version controllee device, until the time when ajtcl's support for dynamically adding and removing bus object becomes available, restart the device whenever a change in plugin units occurs.

Change Property Name for RemoteControllability

- <https://lists.allseenalliance.org/pipermail/allseen-hae/2016-January/001247.html>
- Background
 - Regarding to the RemoteControllability interface, the name for interface and its name for property are identical to each other.
 - From the point of code implementation, having different names for interface and property, respectively is desirable
- Almost agreed Resolution
 - Change the name for property : RemoteControllability (Boolean) → IsControllable (Boolean)

Discuss on Code Contributions

- <https://jira.allseenalliance.org/browse/ASAHAE-22>
- Sample Devices
 - Do we have to provide sample device implementation for every device type the framework support ?
- Standard vs Thin Client
 - The owner for each interface is requested to provide both Standard and Thin Client version implementations.
 - The baseline code contribution for Thin Client is targeted to be done by January 21th.
- More voluntary contributions are requested. The code contributors doesn't necessarily have to be Committers.

Thank you
