

Security 2.0 Technical Meeting 5/5/15

- HLD
 - 2.3.6
 - **Required to close on HLD for 15.08**
 - How onboarding interacts with claiming is not described in a recommended flow
 - Need a flow defined and agreed
 - Having the flow diagram is important to ensure we are all in agreement
 - Recommended high level flow with details addressed in Base Services 2.7
 - HLD was updated on 5/1 with new flow
 - **Action: Phil (QCE)** to update flow with comments from this meeting
 - MSFT will review and comment for next week.
 - 2.7
 - Regarding “Get Identity”
 - **Required to close on HLD for 15.08**
 - Change this to a local call not a remotecall since the local framework is guaranteed to have the identity certificate already by this point, in order to decrease latency and failure cases
 - There are also use cases where this will fail
 - Gerrit (QEO) continued conversation about this on the Core WG email
 - **Decision:** No updates to HLD at this time. Issue is closed.
- IRB
 - Comments centering around error names and the detail in the XML files
 - Latest version incorporating all latest comments submitted
 - Need assistance from team to ensure that this gets closed quickly
 - Assumption is that there are no issues that are blocking for 15.08
- Remaining Tasks
 - JIRA filter set up to track open tasks
 - <https://jira.allseenalliance.org/issues/?filter=11027>
 - This is the main communication method for identifying remaining work and completion dates
 - All code must be feature tested and merged with master before July 24
- Meeting times
 - **Action Chris (QCE):** Send proposed times to mail list
 - Propose Thursdays @ 9am PT
- SRP: Should we deprecate?
 - Will be discussed on Core WG status call this week

HLD and IRB (Interface) technical review 4/28/15

Meeting notes and action items

- HLD
 - **ACTION: Dave (MSFT)** to send out updated HLD document with notes added during this meeting
 - 2.3 figure
 - Add a line to call out certificate exchange in either diagram or associated text
 - Peer authentication is not enforced should be called out
 - 2.3.6
 - **Required to close on HLD for 15.08**
 - How onboarding interacts with claiming is not described in a recommended flow
 - Need a flow defined and agreed
 - Having the flow diagram is important to ensure we are all in agreement
 - Recommended high level flow with details addressed in Base Services 2.7
 - **ACTION: Phil (QCE)** to submit high level flow
 - 2.7
 - Regarding “Get Identity”
 - **Required to close on HLD for 15.08**
 - Change this to a local call not a remotd call since the local framework is guaranteed to have the identity certificate already by this point, in order to decrease latency and failure cases
 - There are also use cases where this will fail
 - **ACTION: Gerrit (QEO)** will continue conversation about this on the Core WG email
 - Plan is to have this closed by end of week
 - 2.5.2.2.1
 - Text for #3 needs to be corrected as noted in Dave’s version of the document
 - 2.5.2.4
 - **ACTION: Phil (QCE)** to reword based on conversation
- IRB
 - Line 82
 - Known limitation and pushed to past 15.08
 - Add to future section about optional fields in manifest template
