

AllSeen Alliance
Certification and Compliance Work Group (under TSC) Minutes
June 16, 2014
5:00pm PST
via WebEx

Presentation slides at:
https://wiki.allseenalliance.org/compliance/overview#meeting_minutes_and_presentations

Participants: Todd Benzies (LF), Telis Kaleas (QCE), Tolly Smith (Silicon Image), Akira Yamazaki (Sharp)

Telis reviewed the Antitrust Compliance Notice and the Bylaws

The Path to Certification

Telis review the path to certification prepare > apply > test > certify. Will be working with AT4 Wireless on building this out. For today, “prepare” has been detailed out in the presentation slides.

Telis gave an overview of the test requirements, the implementation conformance statement, and the Implementation eXtra Information for Testing. Telis detailed out ICS/IXIT vs. Configurations and how the Test Plan Generator automates the mapping of ICS/IXIT to test cases.

A question was raised about the non-mandatory features -- should they be tested? Telis agreed that optional features still should have test cases to make sure they work. The group will also check with AT4 Wireless how they handle this with other alliances. Telis took the action to check with them.

Telis detailed out how to map features to test cases as diagramed in the presentation slides.

Telis ended the call.
