Security 2.0 and 2.1 Feature/Task Matrix

ID	HLD	Feature	Version	JIRA ASACORE	ORG	CC Date	Interfaces	Contributor	Notes
12	2.3.11.2	Trusted Description	2.0			UNK		MSFT/QEO	This is done by the Security Manager 3/2 MSFT - Unclear what MSFT role is here. Need to address with WG 3/3 Agreed that this is a post 15.08 feature but that the design work begin right away 3/31 Rob (MSFT) to take the lead on this item
18	2.4.4	Anonymous session	2.0	1460	QCE	To Plan		QCE	In the current codes, once the app/device is claimed it requires that any user must provide an identity certificate that it can trust. The app has a number of trust anchors to verify the identity trust. We don't allow an anonymous user to access a claimed app. QEO is okay with this being a post 2.0 feature 3/2 - MSFT agrees this is post 2.0 3/3 QEO & MSFT agreed that this is a post 15.08 feature but that the design work begin right away. QCE wants to consider this further.
32	2.3.12.5.1.3	Enable Guild Equivalence	2.0	1473	QCE	To Plan		QCE	QEO asks if it is worthwhile to have Security 2.0 for 15.04 without this feature. defined. No enforcement codes. 3/2 MSFT -- not important for 15.08 because this scenario can be accomplished with existing design. (update ACL for each device or less desireably add bob to guild) 3/3 QEO will clarify the feature and its need.
50	??	Packet Header Encryption	2.0	1430	MSFT	UNK		MSFT	2-25-15: May change based on crypto feedback Felix has unanswered questions for this posed to the WG. P1 for Microsoft. Do this at the same time as 2.0 implementation. 3/2 MSFT - There are 2 proposals. QC and MSFT… Need to address and close on single proposal and get it added to HLD. 3/3 Action QCE to set up meeting to discuss with MSFT 3/31 Rob (MSFT) to follow up and determine plan
51	N/A	Default Authlistener	2.0	1524	QCE	To Plan		QCE	3/2 MSFT - Please define this design and share with WG. Not specific to 2.0 3/3 QEO will submit the proposal
52	2.3.6	Support for signing keys and communication keys	2.0	1409	QCE	To Plan		QCE	2-25-15: Requires design - dependent on use cases from QEO QCE will lead design once use cases are documented - next steps determinied once design is complete May move out depending on design decisions QEO to document use cases 3/2 MSFT - Critical for Security Manager functionality - Needs to be documented. MSFT believes this is a P1 3/3 QEO sent proposal to core mail list. MSFT will review and comment.
53	N/A	IRB Suggestions	2.0	1566	QCE	To Plan		QCE	3/2 MSFT - MSFT supports this effort
54	2.6	Remove GUID from issuer. Add Authority Key ID	2.0	1720	QCE	To Plan		QCE	
55	2.3.9	Add manifest to Identity cert. Remove auth data association from membership cert	2.0	1721	QCE	To Plan		QCE	
56	2.5.2.2.1	Generate default outbound ACLs after claim	2.0	1722	QCE	To Plan		QCE
