ALLSEEN ALLIANCE

Core Working Group Meeting

Reminder:

This call is being recorded

Antitrust Compliance Notice

- AllSeen Alliance meetings involve participation by industry competitors, and it is the intention of AllSeen Alliance to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of and not participate in any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at AllSeen Alliance meetings and in connection with AllSeen Alliance activities are described in the AllSeen Alliance Antitrust Policy. If you have questions about these matters, please contact your company counsel, or if you are a member of AllSeen Alliance, feel free to contact Lee Gesmer or Andrew Updegrove, of the firm of Gesmer Updegrove LLP, which provides legal counsel to AllSeen Alliance.

Agenda

- Committers: Way will be stepping up to fill in for Dan as he cannot devote as much time as he has in the past

- 16.10 Feature Status:
  - IPv6
  - https://wiki.allseenalliance.org/core/core_16.10_release_plan#themes_and_priorities

- Removal of non-XML C++ Security 2.0 APIs.
  - Decision made to only go with XML given current state of things. Specifically sounds like there is some risk on the Java front, one way to mitigate that is not to worry about non-XML bindings.
  - AI: all changes that are not final related to the Sec2.0 language bindings should be abandoned ASAP
    - New commits with just he XML should be pushed up as soon as they are ready
  - **AI:** respond to Josh's mail on mailing list with this decision

- C&C discussion
  - Test cases: https://git.allseenalliance.org/gerrit/#/c/8569
    - cpp/components/validation-ctt/HEAD/ctt_testcases/Security20TestSuite.h
    - cpp/components/validation-ctt/HEAD/ctt_testcases/Security20TestSuite.cpp
    - AT4 believes it is under control – Ram also confident that the test cases will be covered by the end of the month.

- Documentation Testing
  - Lot of failures. In particular ASADOC-103. Thin client documentation is completely broken.
    - Close to complete
  - Need sanity check on Windows 8: Justin provided feedback on thread.

- Affinegy team to review existing test cases for new features or updated components (TestLink)

Thank You
