- Need proposal for setting up and maintaining automated test infrastructure
  - David McBride (QCE) to lead – Arvind Padole (MSFT) to support
    - Proposal to be sent to Core WG mail list for discussion and follow up call
    - Need to identify base process and set of rules
      - e.g. The contributor for a feature is responsible for all feature testing and contributing unit tests for the feature
        - Including supported platforms
- Question: Can this be supported by the Linux foundation?
- Note: Greg states funding from the Alliance is possible
  - Needs to be clearly defined and approved by the Alliance
- Need to identify space for housing infrastructure
- Potential for AT4 wireless to support
  - They are under contract for C&C
- Regression testing
  - How best to share the effort?
  - Should be included as part of the proposal
    - Identify the effort/material required
- Request for member companies to assist in keeping the platform matrix current:
