ALLSEEN ALLIANCE

Core Working Group Meeting

Reminder:

This call is being recorded

Antitrust Compliance Notice

- AllSeen Alliance meetings involve participation by industry competitors, and it is the intention of AllSeen Alliance to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of and not participate in any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at AllSeen Alliance meetings and in connection with AllSeen Alliance activities are described in the AllSeen Alliance Antitrust Policy. If you have questions about these matters, please contact your company counsel, or if you are a member of AllSeen Alliance, feel free to contact Lee Gesmer or Andrew Updegrove, of the firm of Gesmer Updegrove LLP, which provides legal counsel to AllSeen Alliance.

Agenda

- Removal of non-XML C++ Security 2.0 APIs.

  – Consensus is to not project the non-XML to other bindings (Java and Obj-C) but not remove these from the C++ binding

  – All of the bindings will expose the XML based bindings

  – Follow up on Java binding discussion in 8/25 meeting – it wasn't clear how difficult it is to expose the non-XML bindings

  – Suggestion for the work that has already been done for Java and Obj-C is to leave the work that has been done in Gerrit, so it can be resurrected down the line if there is a desire to support that functionality

- C&C discussion

  – Test cases: https://git.allseenalliance.org/gerrit/#/c/8569

    • cpp/components/validation-ctt/HEAD/ctt_testcases/Security20TestSuite.h

    • cpp/components/validation-ctt/HEAD/ctt_testcases/Security20TestSuite.cpp

    • Anyone taken a look?

  – No one has yet taken a look

Agenda (didn't get covered)

- Also there is an issue with 16.04: [ASACOMP-166](#)
  - Some infrastructure changes were made, and more to follow to attempt to address.
  - Ry will update bug when all infra changes are in place asking for retest.
  - Any updates on the status here?

- Add support for ARM64 (3108)
  - AI: Kris to give WG estimate for platform test plan time.

Thank You
