Agenda

1. Introductions
2. Status Updates
3. Other Business

Attendees

Name	Company
Art Lancaster	Affinegy
Jim Howard	Affinegy
Josh Spain	Affinegy
Javier Domingo Cansino	Fon
Shane Dewing	Qualcomm

Action Items

1. Jim Howard – push Package Manager code to git later this week or early next week

Meeting Notes

- There are a few things left to complete the Package Manager implementation. It will likely be pushed to git later this week or early next week.
- XMPP cloud connector will likely be written in Lua
- DeviceHive has an existing REST-based cloud service.
  - They added AllJoyn to their cloud.
  - They will possibly be providing a version of their API to comply with the Gateway Agent specification.
- Structure of the Working Group
  - We will likely structure the working group with connector applications as separate projects within the working group.
    - The question will be what to include in the full AllJoyn feed.
- Redbend is working on the Update Service project inside the working group.
  - They will likely be involved in these meetings soon.
- Release Cadence changes were made to the AllJoyn framework
  - Changed from 3 releases per year to 2 core releases/year and 2 base service releases/year.
    - Separate working groups will release on their own schedules and be folded into the other major releases.

- Gateway Working Group still plans a release in October of this year.
  - Gateway Agent first release will be based on AllJoyn framework 14.6 but will need to update to the 14.12 security changes.
